

ANSHDEEP SINGH

Full-Stack & AI Software Engineer · SDE-1

Bengaluru, India · +91-7982491262 · anshd258@gmail.com · github.com/anshd258 · linkedin.com/in/ansh-deep

SKILLS

Languages	Python · Java · JavaScript · TypeScript · Dart · C++ · SQL
Backend	Express.js · FastAPI · Nest.js · REST APIs · CI/CD
Mobile / Frontend	Flutter · Next.js · React.js · ShadCN UI
AI / Data / Cloud	LangChain · LangGraph · MCP · RAG · Semantic Search · ChromaDB · TensorFlow · Gemini · Claude · Ollama · AWS

EXPERIENCE

Posha · SDE-1 Nov 2025 – Present

Best Quarterly Performer (5 months in). Full-stack ownership across all 4 major repos: IoT device, mobile companions, and AI tooling.

- Spearheaded a Figma-to-Flutter agentic, design-system-aware code generation system; built a complementary Figma linter that nudges designers toward design-system-conformant structures, dramatically improving handoff quality.
- Designed and shipped an internal multi-agent code review system (similar to Deep-Hook) now in production across all major repos; deployed webhooks and the GraphQL backend on AWS.
- Built and shipped MCP tools exposing the internal commons package to LLM agents, plus an extensible MCP-style LLM evaluation pipeline for structured, automated AI review and quality rules.
- Delivered Grocery and Subscriptions features end-to-end, unlocking the company's first non-hardware revenue stream; spans Flutter, native iOS/Android features, and Java engine integration with Flutter for seamless cross-platform delivery.

NeoSurge Pvt Ltd · SDE-1 (Short-term) Aug 2025 – Nov 2025

- Spearheaded ZapPay, launching instant mutual fund redemption features with high-signal C# / ASP.NET backend integration and a Flutter mobile app.
- Engineered core features for Sernet Tech's TickFunds, including Loan Against Mutual Fund (LAMF) and advanced financial operations.

Stimuler Pvt Ltd · SDE Intern Dec 2024 – Jul 2025

- Core contributor as a Mobile and Generative AI Developer on India's Best AI App of 2023 — engineered a highly available core translation system serving over 2 million active users.
- Architected app-wide instrumentation and observability telemetry to drive real-time performance monitoring, serving as both a production health signal and a critical ML data source for product decision-making.

PROJECTS

Deep-Hook · Multi-Agent Code Review Platform · Open Source · [Backend Repo](#) · [Review Library](#) Mar 2026

- Built a LangGraph + LangChain multi-agent orchestration engine for structured code review on GitLab merge requests via webhook ingestion, supporting per-project YAML configs and pluggable MCP servers.
- Implemented a ChromaDB-backed RAG layer for semantic search over project context and review history, giving agents grounded retrieval before generating review comments.
- Implemented async task lifecycle with per-MR cancellation: newest webhook event preempts in-flight reviews, using FastAPI background tasks and a singleton task manager keyed on (project_id, mr_id).
- Designed the diff-conversion layer (asset filtering, diff truncation) and bot-comment state machine (loader → final analysis) for resilient, idempotent reviews. Stack: Python · FastAPI · LangGraph · LangChain · ChromaDB · Docker · uv.

DhirPrint · Full-Stack AI Generative Platform · [Live Demo](#) Sep 2024

- AI-driven generative design engine using Gemini AI, dynamically adapting custom printing outputs to product size and user specifications; full-stack Nest.js + Next.js with ShadCN UI, OTP login and smart chat.

Krishi Gyan · IEEE-Published Real-Time Agri-Tech App · [IEEE Paper](#) Aug 2024

- Integrated spectroscopic sensors into a Flutter-Firebase app for real-time soil nutrient analysis; built a TensorFlow recommendation engine optimizing crop selection and nutrient management.

EDUCATION

Guru Gobind Singh Indraprastha University (GTBIT) · B.Tech CSE · CGPA 9.0 / 10.0 2021 – 2025

AWARDS & LEADERSHIP

- Awards: 1st Prize – Lumos Hackathon (IIIT-Delhi) · 2nd Prize – Solana Hack Delhi (IIT-Delhi) · Best App Developer – GDG GTBIT. · Leadership: Tech Lead, Google Developer Group on Campus (Aug 2023 – Aug 2024).
